SUMMARY

Full Stack Developer with 3 years of experience building scalable web applications using React.js, Next.js, and SvelteKit, with backend development in Node.js and Express.js. Experienced in designing RESTful APIs, optimizing UI performance, and developing reusable, maintainable components using TypeScript and modern frontend practices. Worked on domain-driven applications including loan processing systems, healthcare platforms, and rule engines, contributing to performance improvements and efficient data handling. Focused on delivering clean, scalable architectures and high-quality user experiences.

SKILLS

- Frontend: React.js, Next.js, SvelteKit, JavaScript (ES6+), TypeScript, Tailwind CSS, Responsive Design, State Management
- Backend: Node.js, Express.js, REST API Development, API Integration, Code Quality, Problem-Solving
- Databases/ORMs: MySQL, MongoDB, SQL Server (SSMS), Sequelize
- DevOps & CI/CD: Git, GitHub Actions, Azure, Docker (Basic)
- Testing & API Tools: Playwright, Vitest, Postman

WORK EXPERIENCE

Software Engineer, Evince Development

Jun 2023 - Present

- Designed and developed a FinTech SaaS platform for loan processing, implementing income analysis workflows to support data-driven lending decisions.
- Built and maintained scalable RESTful APIs using Node.js and Express.js for financial, healthcare, and scheduling systems, improving data processing efficiency.
- Gathered and translated B2B and B2C business requirements into technical solutions, ensuring accurate implementation and improved client satisfaction.
- Led migration from JavaScript to TypeScript and introduced a service-based architecture, improving code maintainability, scalability, and reducing defects.

Associate Software Trainee, Evince Development

Oct 2022 - May 2023

- Contributed to frontend and backend development using JavaScript, optimizing resource management, and reducing application load time.
- Conducted API testing with Postman and prepared technical documentation, improving debugging efficiency and streamlining code review processes.
- Collaborated on backend architecture and API development in real-world projects, gaining experience in scalable system design and team workflows.

PROJECTS

Bankuity (SvelteKit, .Net, Tailwind CSS)

Sep 2023 – Present

- Developed a loan income analysis platform to evaluate customer income, analyze trends, and support data-driven lending decisions, including customer and admin modules for multi-institution loan management.
- Built scalable, responsive UIs using SvelteKit and Tailwind CSS, and collaborated with backend teams to translate business requirements into .NET-based APIs for financial data processing.

Self-Serve Portal (Next.js, shadcn/ui)

Dec 2025 - Present

- Migrated legacy UI to a modern, responsive Next.js application using shadcn/ui, improving performance and user experience.
- Developed a self-service loan portal with payment management, installment scheduling, autopay features, and seamless API integration with backend systems.

Hasanui Healthcare (Node.js, Angular, Sequelize, MS SQL)

Jun 2023 - Jan 2024

- Developed healthcare web applications with Node.js, Express, and SQL Server, building REST APIs for patient management, inventory, medicine tracking, and financial modules.
- Improved backend performance by ~40% using Sequelize ORM and resolved race conditions to ensure data consistency in concurrent inventory workflows.

Voucher Import & Manufacturing Schedule (React, Typescript, Node.js, MS SQL/T-SQL)

Jan 2024 - Present

- Built a manufacturing data platform to import vouchers, manage schedules, and visualize production data using React and TypeScript.
- Developed Node.js and SQL Server backend APIs with advanced CRUD, filtering, and tabular views to improve operational efficiency and data visibility.

Rule Engine (Next.JS, Typescript, Node.js, shadcn/ui)

Jul 2024 - Present

- Developed a rule management system enabling non-technical users to create and manage business rules using Next.js and TypeScript.
- Built secure Node.js services to validate and execute rules, automating loan processing workflows with scalable and maintainable architecture.

Lead Processing (Next.JS, Typescript, Node.js, shadcn/ui)

May 2024 - Present

- Built an admin platform to manage loan portfolios, call center operations, and campaign workflows using Next.js and TypeScript.
- Developed scalable Node.js APIs and modern UI components with shadcn/ui to track application lifecycles and improve operational efficiency.

EDUCATION

GIET University, Gunupur, Odisha

Jul 2021 -May 2023

Master of Computer Applications (CGPA 9.3/10)
